

Brief: Federal Communications Commission (FCC)

© 2022 Noam Grunes

The Federal Communications Commission (FCC) may appear to be a functionally genocidal organization that needs to be replaced. Among tenable crimes against humanity:

- Enabling frequency devices at what the FCC recognized to be peak oxygen absorption, inhibiting respiration, which may lead to death with or without interim hook-up to a ventilator.[1]
 - Enabling communications in the vicinity of brain function, letting covert agencies and military contractors operate brain-computer interfaces which citizens cannot block by any “jammer” without risk of police or FBI invading their premises.[2]
 - Enabling cell phones found to be associated with brain and breast cancers, even when merely stored near a breast when not in use.[3]
 - Enabling wi-fi in hospitals and schools after it was associated with deaths.[4]
 - Enabling “5G” found to impair animal health by the 1970’s without any, let alone any rigorous, long-term human safety testing unaffiliated with industry sponsorship.[5]
 - Failing to correct findings that the FCC exhibits among other C’s of public entities, being compromised, corrupt or captured by deleterious financial interests.[6]
1. All frequency use near peak oxygen absorption, peak water absorption or brain-wave function can be promptly outlawed, a felony when deployed intentionally.
 2. The FCC can be replaced by say Frequency Health Assurance granting authorizations based on long-term safety data representative of real-life use, as voted by thousands of doctors after reviewing peer-reviewed test reports without any conflict of interest.
 3. Jamming equipment to offset deleterious frequencies, without long-term range, should be promptly legalized. Intentional harm as by interfering with aircraft communications upon takeoff or landing would be punishable separately.

[1] In Bulletin Number 70 (July 1997), the FCC noted a “60 GHz oxygen absorption peak for all elevation angles” and subsequently authorized routers and communications there.
